Enes Erul

Eskişehir, Türkiye · eneserul0@gmail.com · GitHub · LinkedIn · Personal page

Software Engineering student looking for a mandatory internship. I lean towards backend and enjoy mobile development.

EDUCATION

Near East University, B.Sc. Software Engineering (English program). Expected graduation: 2027

PROJECTS

Guestbook · React, TypeScript, Express, Turso · Live · Code

- Deployed a guestbook app with the client on Vercel, the API on Render and the database on Turso.
- Added a Dockerfile for the API and a GitHub Actions workflow that runs all 24 tests on every push.

Engellerden Kaçma · TypeScript, HTML Canvas, Vitest · Play · Code

- Built and published a 3-lane browser game on itch.io, with the game rules kept in pure functions covered by 36 tests.
- Found through playtesting that some targets were unreachable, then fixed it by tuning player speed and spawn interval.

Weather App · React Native, Expo, Jest · Code

- Built a mobile app that shows current weather from Open-Meteo and keeps the city list on the phone with AsyncStorage.
- Handled loading, offline and empty-list states, and covered the core logic with 11 tests.

Notes API · Express, SQLite, bcrypt, JWT, Jest · Code

- Added registration, login and per-user note ownership to a REST API, verified by 12 tests.
- Returned 404 instead of 403 for other users' notes so the API does not reveal that a note exists.

AI Code Review · JavaScript, Vitest · Code

- Reviewed an AI-written O(n×m) function and improved it to O(n+m) with a Set, measuring about a 39x speedup on 10,000-item lists.

SKILLS

- **Programming:** JavaScript, TypeScript, HTML, CSS
- **Backend:** Node.js, Express, REST APIs
- **Mobile:** React Native, Expo
- **Testing:** Jest, Vitest
- **Tools:** Git, Vercel, Render, Claude Code

LANGUAGES

Turkish (native), English (B2, university level, no formal certificate)
